## WISCONSIN LOCAL EMPLOYMENT & UNEMPLOYMENT ESTIMATES RELEASED

*Latest BLS estimates include January revised, February preliminary*

MADISON – The Department of Workforce Development (DWD) today released the U.S. Bureau of Labor Statistics' (BLS) estimates of unemployment and employment statistics for metro areas, major cities and counties in the state of Wisconsin. The estimates include revisions for January 2014 and preliminary estimates for February 2014. In brief, the estimates showed:

- **Metropolitan Statistical Areas:** Preliminary February 2014 unemployment rates (not seasonally adjusted) increased in all 12 metro areas, compared to rates in January 2014, but decreased in all 12 metro areas compared to rates in February 2013. The February 2014 rates ranged from 4.9 percent in metro Madison to 8.7 percent in metro Racine.
- **Municipalities:** Preliminary February 2014 rates increased in all but two of Wisconsin's 32 largest municipalities from January 2014. Beloit's rate remained the same, and Mount Pleasant's rate decreased. February 2014 rates decreased in all 32 municipalities when compared to February 2013 rates. February 2014 rates ranged from 3.9 percent in Caledonia to 11.5 percent in Racine.
- **Counties:** Rates increased in all but three of Wisconsin's 72 counties from January 2014 to February 2014. Iron County's rate decreased, while Bayfield and Florence had no change. When compared to a year ago, the February 2014 rates decreased in all counties with two exceptions: Florence and Green Lake, where rates increased. The February 2014 rates ranged from 4.6 percent in Dane to 12.7 percent in Bayfield.

As local unemployment rates are not seasonally adjusted, rate increases from January to February are typical. The rates are due to an expanding labor force, as more individuals seek employment with the improving economy and increasing job postings.

On March 27, DWD released BLS preliminary state employment and unemployment estimates for February 2014, estimates showing Wisconsin's unemployment rate declined from a revised rate of 6.2 percent in January 2014 to a preliminary rate of 6.1 percent in February 2014. The rate is Wisconsin's lowest monthly rate since November 2008, down from a high point of 9.2 percent in 2010, and below the national unemployment rate of 6.7 percent.

DWD also previously released BLS' preliminary February 2014 employment estimates showing Wisconsin gained 28,900 private sector jobs from February 2013 to February 2014 (seasonally adjusted), including 6,000 jobs in manufacturing.

Total seasonally adjusted nonfarm job growth was 30,000 jobs year over year. Other highlights of February 2014 estimates, when compared to January 2014, include gains in educational and health services, construction and manufacturing (non-durable goods). A decline in seasonally adjusted estimated government jobs by 7,900 followed a notable gain in government jobs the previous month.

(more)

The BLS uses three data sets to measure employment and unemployment:

- **Current Employment Statistics (CES):** compiled from a monthly survey sent to about 5,500 employers (3.5% of Wisconsin employers). CES data has been shown to be subject to significant revision.
- **Local Area Unemployment Statistics (LAUS):** compiled from a monthly survey of 1,450 households. Measures the labor force, employment, unemployment, and the unemployment rate.
- **Quarterly Census of Employment and Wages (QCEW):** compiled on a quarterly basis from Unemployment Insurance records from some 96 percent of Wisconsin businesses. Considered by most economists to be the most accurate measure of jobs, the QCEW includes data from almost all employers in Wisconsin.

Other indicators that help illustrate the state of Wisconsin's economy include:

- QCEW: Wisconsin ranked 8th highest in the country in average weekly wage growth (total covered jobs) for the third quarter of 2013 when compared to the third quarter of 2012, and 6th highest over this time for private sector average weekly wage growth.
- QCEW data show Wisconsin added over 63,000 private-sector jobs in 2011-12. The back-to-back, 2011 and 2012 calendar year QCEW private sector job creation totals are the best two-year gains in over a decade.
- [Department of Revenue](#) state general fund revenue collections through February: up by 3.9 percent in fiscal year 2014 over the prior year.
- [Department of Financial Institutions](#) new business formation: up 8.3 percent YTD in 2014 over previous year.
- Initial weekly Unemployment Insurance claims for the first 12 weeks of 2014 dropped to the lowest point since 2000.
- The year-to-date average weekly UI claims are at a 12-year low.
- Wisconsin's exports exceeded \$23 billion in 2013.
